

Preparation for Roach Control

- All open boxes of grains like cereal, rice and pasta should be thrown away as Roaches may be inside and could potentially reemerge or reinfest after treatment
- All sealed, un-opened boxes of grains where the grains are sealed within a plastic bag inside the box, or boxes sealed with an exterior plastic covering should be placed in a large bag to be kept in a safe place away from treatment
- Clear all cabinets and drawers of food, pots, pans, silverware (ect) and place in a large bag to keep safe during treatment and give technicians access to all areas which require treatment
- Clean all eating areas of crumbs, grease or food and drink residue
 - Clean oven, burners, cook-tops range hoods of crumbs and grease
 - Throw away any aluminum foil used to collect grease
 - Pull stove out from wall and thoroughly clean behind it including the wall
 - Clean crumbs out of all cabinets, drawers, pantry and countertops
 - Possibly hire a cleaning company to THOROUGHLY clean areas mentioned above
- Remove any clutter away from walls from each room like loose boxes or clothes
 - Small pieces of furniture can be moved from against wall
- Prepare to leave the structure IMMEDIATLEY at the time of your appointment for a duration of 4 hours. The technician will leave the time the treatment ended on our door tag.
